The Ohio Center for Ecology & Evolutionary Studies

2014 DARWIN LECTURE

Presents.... Dr. Mike Webster
Cornell University

Darwin & Misperceptions:
What Evolution Isn’t

Monday February 17th
4:30 pm  Baker Center Theatre

Abstract: Evolution is a key building block of modern biology yet it is not accepted by most Americans. Dr. Webster will address misunderstandings about what evolutionary biology is and isn’t that fuel the debate over “intelligent design” and that are often echoed in the media.

Also Tuesday 4:00  Biological Sciences / Biomedical Sciences Department seminar:
Irvine 159  Sexual selection and speciation in an Australian bird
